

Ganga Ram Tanwar

AWS Architect | Cloud Architect | DevOps Architect

NOIDA, INDIA | EMAIL: ganga.tanwar@gmail.com | PHONE: (+91) 9810999308

Professional Summary

AWS Certified Solutions Architect – Professional with 18+ years of experience designing, modernizing, and operating large-scale, cloud-native and hybrid enterprise systems. Proven expertise in application modernization (monolith → microservices/serverless), multi-region high-availability architectures (99.99%), event-driven systems, and DevOps / DevSecOps automation. Strong track record of aligning business objectives with scalable AWS architectures, leading cross-functional teams, and driving cost, performance, and reliability improvements across complex enterprise landscapes.

Core Architecture & Leadership Competencies

- Hands-on architecture leadership with deep understanding of full-stack application design (Java & Node.js ecosystems).
- **Solution & Enterprise Architecture:** Cloud-native, Event-driven, Microservices, Serverless, DDD, API-First
- **Application Modernization:** Legacy Java EE → Cloud-native AWS architectures
- **Cloud Platforms:** AWS (Well-Architected Framework, Multi-Account Strategy)
- **DevOps & DevSecOps:** Continuous Integration/Continuous Delivery, IaC, automated security & compliance
- **Reliability Engineering:** Multi-region HA, DR, resiliency, observability
- **Leadership & Governance:** Architecture reviews, mentoring, technical roadmaps
- **Digital Transformation:** Cost optimization, scalability, modernization strategy

Technical Skills

Cloud & DevOps

- **AWS:** EC2, S3, CloudFront, API Gateway, Lambda, ECS, EKS, RDS, Aurora Serverless, DynamoDB, Kinesis, EventBridge, Step Functions, SNS, SQS, IAM, KMS, CloudWatch, X-Ray, CloudTrail
- **IaC:** AWS CDK, CloudFormation, Terraform
- **CI/CD:** Jenkins, GitHub Actions, CodePipeline, CodeBuild, CodeDeploy, Ansible
- **Containers:** Docker, Kubernetes, ECS, EKS

Application & Integration

- **Languages:** Java, Node.js, JavaScript, TypeScript
- **Frameworks:** Spring Boot, Spring Cloud, Spring Security, Hibernate, Struts 1.2
- **Messaging:** SQS, SNS, EventBridge, ActiveMQ, RabbitMQ, Apache Camel
- **Databases:** PostgreSQL, MySQL, Oracle, DB2, DynamoDB, Aurora, Elasticsearch, Neo4J
- **Development & Build Tools:** GitHub, Maven, CI/CD & DevOps toolchains

Observability & Security

- CloudWatch (Metrics, Alarms, Dashboards), X-Ray, ELK
- OAuth2, JWT, IAM least-privilege, Secrets Management
- SonarQube, Checkmarx, DevSecOps pipelines

Professional Experience

Sopra Steria India | Technical Consultant | June 2018 – Present

- Architected end-to-end AWS solutions for enterprise and product-based applications.
- Led application modernization initiatives, transforming monolithic Java EE systems into microservices and serverless architectures using AWS Lambda, ECS/EKS, API Gateway, and EventBridge.
- Designed multi-region active-passive and active-active architectures, achieving 99.99% availability and robust disaster recovery.
- Implemented event-driven architectures using Amazon EventBridge and SQS, reducing system latency by ~70%.
- Defined cloud migration strategies (rehost, refactor, re-platform) aligned with business priorities.
- Built IaC-based platforms using AWS CDK and CloudFormation to standardize environments and reduce provisioning errors.
- Established enterprise-grade CI/CD and DevSecOps pipelines, integrating automated testing, security scans, and controlled releases.
- Designed blue-green and canary deployment strategies for zero-downtime releases.
- Led and mentored 10+ engineers conducted architecture reviews, and enforced cloud and coding best practices.
- Implemented cost-optimization strategies (resource tagging, usage monitoring, environmental isolation).

IBM India | Technical Lead | June 2011 – June 2018

- Implemented and reviewed clean, efficient, and maintainable code using Java, JSP, Servlets, Struts, Spring, Hibernate, and JPA.
- Implemented and enforced coding standards (SOLID principles, DRY, KISS).
- Reviewed and refactored legacy codebases to improve scalability and maintainability.
- Oversaw unit testing, integration testing, and automated testing strategies.

Earlier Roles:

- TCS | IT Analyst (March 2010 – June 2011)
- eDynamic Softech | Software Engineer (December 2007 – March 2010)
- Z-Axis Technologies | Software Developer (August 2006 – December 2007)
- Designed and developed enterprise web applications using Java, Spring, Struts, Hibernate.

Projects

- PCP Applications: Defined architecture and led delivery of a suite of cloud-native AWS applications.
- AirnavX: Aircraft Documentation Navigation System, basically is a system to publish documents, update access rights, manage acknowledgment and give access to users (Airlines, librarians, etc.) to their documentations. Tech Stack: Angular, TypeScript, Java 21, Spring boot, Spring, PostgreSQL, Elasticsearch, REST API, SOAP Webservices, XML, Neo4J, Liquibase.
- Optimal Mediation: Optimal Mediation (Fuse Integration Middleware) Worked as a Project Lead in Mediation flows for the client using Java DSL and Apache Camel and deploying over Fuse Karaf Server. Tech Stack: Java, Apache Camel, Fuse Server.
- E-Leclerc – Isocel: Designed microservices architecture using DDD and Spring Boot. Tech Stack: Java 1.8, Spring MVC, Spring Data, Spring Batch, REST API, Microservices, Eclipse, Gitlab, Jenkins, CI/CD tools, DevOps SonarQube, PostgreSQL, Mockito, Gatling, Cobertura, Ember JS
- MetLife – Monarch Migration: Modernized legacy Java EE applications (WAS 6.1 → 8.5.5, Java 1.5 → 1.8).
- Enterprise Application Integration - Mobily Etihad Etisalat: Set of middleware services for Telecom. Tech Stack:

Core Java 1.5, Web Services, Clear Case, Oracle 10g, WebSphere MQ, Message Broker.

- ANEC Visitor Management System: This application was for managing the NOC visitors (VIPs, Business Partner, Customer / Client for sales support, etc.) to ANEC (Airtel Network Experience Center) Manesar. The application will facilitate the requestor to initiate a request with details of Visitor intending to visit the location. Tech Stack: Java 1.5, Spring MVC 3.0, Hibernate3.0, web services, JSP, JavaScript, DB2, WebSphere Application Server, RAD 7.5.
- HR Webtech Project: Bundle of HR applications. Tech Stack: Java 1.4, Spring, SOAP based Web services, JSP, Servlet, JavaScript, DB2, WebSphere Application Server, RAD 7.5
- Max New York Life: Insurance Portal. Tech Stack: Java, JSP, Servlet, Struts 1.2 and Hibernate 3.0.
- MaxAtHutch: Reward and Recognition portal Tech Stack: Java, JSP, Servlet, Struts 1.2 and Hibernate 3.0.

Education & Certifications

- AWS Certified Solution Architect Professional (valid till 2027).
- AWS Certified Developer Associate valid till April 2027
- AWS Certified Solution Architect Associate.
- Master of Science (Information Technology)- 2003
- Bachelor of Science (Non-Medical Science) - 2000
